

**Control. Capabilities. Performance.
At Your Fingertips**

Optimize Capability, Minimize Waste

You already know the energy savings variable frequency drives (VFDs) deliver. Most VFDs are loaded with features that you don't need or do not fit your application. With Honeywell's SmartVFD COMPACT, you select the capabilities you need. Our compact line lets you customize the drive features to the application, eliminating waste.

Not Too Many, Not Too Few

The SmartVFD COMPACT isn't overloaded with features you won't use. Nor are you limited to just a few. Instead, the SmartVFD COMPACT provides the perfect balance, with essential features like a standard PI Controller and the ability to program without the need for line voltage. From there, you can choose only the options you need to meet your application:

- Interface
- Enclosure
- Outputs
- Filter
- Inputs

Maximize Space

The SmartVFD COMPACT lets you make the most of the available space in your application. It's a true micro drive — is among the smallest, most streamlined VFDs on the market, which saves space in your equipment cabinet.

FRAME SIZE	FRAME HEIGHT	FRAME WIDTH	FRAME DEPTH
MI1	6.2"	2.6"	3.9"
MI2	7.7"	3.5"	4.0"
MI3	10.2"	3.9"	4.3"

Minimize Expense

Because you choose only the options you need, you save money to keep your installed cost low. Along with the compact size for installation ease, the intuitive user interface makes commissioning a breeze. In short, the SmartVFD COMPACT is built to save you time.

- Easy commissioning
 - Intuitive user interface
 - PI controller included, standard
 - Program without the need for a main power supply
- Easy installation
 - The most streamlined VFDs on the market
 - DIN rail or screw mounting
 - Side-by-side mounting
- Easy communication
 - Up to seven programming control inputs
 - Up to three programmable control outputs
 - Several fieldbus options available

Programming At Your Fingertips

The SmartVFD COMPACT architecture is created with ease of use and speed in mind. With the touch wheel as the central feature of the API (application interface) you can configure the drive to your specific application.
